Protocol #20-0309

Participate in a Study on Cannabis and Memory!

In this study, we want to understand how varying levels of cannabinoids (e.g., THC and CBD) impact things like your memory and cognition. To better understand the effects of varying levels of cannabinoids, we ask you to provide blood samples.

You may be eligible to participate if you:

- Are 21-40 years old
- Have used cannabis for at least 1 year
- Are right-handed

This study involves:

- 1 appointment at our lab facility in Boulder
- 2 appointments in our mobile lab (we drive to a location convenient to you)
- Blood draws
- EEG recording
- Cognitive tasks
- Brief & confidential questionnaires

If you are interested, please contact CUChange at:

303-735-4486 or **COBRA.CUStudy@gmail.com**

or scan the QR code to complete the eligibility survey:

You will be compensated \$20/hour
(approximately \$150 for 7.5 hours)
